Maintenance: Less Costly Than Rebuilding

Rust never sleeps, but you can rest easy after our Structural Group assesses your facilities and infrastructure. Our inspections are complemented by detailed analysis and reporting to provide actionable insights for current and future planning.

Make the Most of Down Time

Targeted advice based on our analysis helps clients maximise plant shut-downs with prioritised recommendations for maintenance and rehabilitation works

Civil Structures of every Description

From bridges to tunnels, flood defence structures to retaining walls, our team can assess, analyse and provide advice on integrity, remaining service life and staged maintenance and rehabilitation. Our expertise covers the full breadth of modern and traditional construction materials: steel, reinforced concrete, timber, aluminium and composites.
